

If riding horseback causes self esteem, a good many people might better walk.

What kind of a situation has the man who starts out to hunt for an easy job? Try it and see.

The hopeful localities for a free library seem to think it is a long time between donations by Mr. Carnegie.

The coal strike is entering upon its twenty second week, and yet seems no nearer an end than when it was launched.

Only seventy-five earthquake shocks in one day is the latest record in Mexico. But that is certainly sufficient.

Hanna's full dinner pail may be all right, but his empty coal bin is certainly emblematic of a chilly time coming.

Another anti-Clarke party is to be organized in Montana, which means a rapid incline in the price of legislative votes.

There will soon be very few towns in Mississippi that cannot boast of one or two factories of some kind or other.

The Democrats of Massachusetts running for congress are making their campaign purely upon the question of a lower tariff.

The farmers seem to be satisfied with the present price of cotton and are rushing it in as fast as they can gather it from the stalk.

Secretary Shaw was there, Johnny on the spot, to remove the money pressure on the New York banks when the howl went up for help.

An Ohio teacher who compelled white girls to kiss colored girls with whom they had quarreled, is ready for another job. None in this section for her just now.

There is no difference in the cost of a frown and a smile, but the purchasing power of the smile for good is only equaled by the power for harm of the frown.

There are a large number of people who don't care a fig whether Senator Platt has been turned down by the Republicans of New York or not. Nor will they weep if the same turn is made on Roosevelt.

Labor is in demand all over the state of Mississippi, and yet there are scores of strong, robust, seemingly well fed men idling around many of the towns, not excepting our own, with nothing to give them care or concern.

It is estimated that the insurance companies will collect about 18 cents per bale this year on cotton instead of 3 cents as heretofore, and yet the Governor doesn't think it necessary to try and have the matter taken up.

The Democrats are not the only people in this country in favor of lowering the tariff. There are a good many good people in favor of swatting the whole thing and putting our country on a fair and square free trade basis. This is the only route visible to get at the trusts properly.

It isn't very credible to reflect that the city authorities of the state capital of Mississippi work women on the streets under the vagrancy law, while any of the other towns in the state allow dozens of healthy male vagrants to wander about at will, undisturbed.

Chester A. Arthur was endorsed by the Republicans of New York for the nomination for president, while he was serving the term into which he came from the vice-presidency, but he was not nominated, nor will the present occupant of the white house likely break the rule.

One of the greatest sources of revenue to the farmers of Mississippi and of the entire South, in fact today, was but a few years ago, considered only a worthless part of the year's product. This is the cotton seed which today enters into the production of an enormous sum of ready cash to the country, and gladdens the heart of every man who produces it.

The opening of the Oklahoma Industrial College of this city yesterday was attended by a large audience of the leading colored people of the city, in whose interest the school is promoted, and also by a good many white citizens who are friendly to the enterprise and desire to encourage their colored friends in the advancement of their young in such manner as to make of them more useful and productive citizens. The leading colored men of Oklahoma are earnestly pushing for the perfection of this college, and they are encouraged in their effort by every citizen of the city who has at heart the welfare of all man-

kind. The programme at the opening yesterday was especially interesting, as was also the remarks of Prof. Battle, the President of the college. Several white gentlemen present made short speeches and spoke encouragingly for the institution, as they believed it in the hands of so competent a President and board of directors.

Of course the government always comes to the relief of the New York bankers when they run short of cash. The department deposits lately have been increased, and now it is stated that the bankers of the metropolis have plenty of money to move the crops. There has always been a stumbling block somewhere in the dependency of the country upon the New York banks to furnish the money to move crops. Crops would seem to be able to move themselves. Isn't it barely possible that there is a rake off for the banks in this crop moving business, and that the government furnishes the capital while the banks get the rake off?

Booneville officers have rid the town of the worthless loafers who have been infesting the public for a long time. The course pursued was an easy and effective one. The robust fellows who had been loafing around, refusing to work when the opportunity was offered them, but preferred to gather about the depot and watch the cars come in, were all arrested under the vagrancy ordinance, fined \$25 and costs, and hired out to farmers in the vicinity to work out their fine and costs. The farmer pays 40 cents a day for the prisoners and charges them 30 cents for their board, which leaves 10 cents to be credited daily on their fine and costs. About 25 loafers were taken in by the city the first sweep around the depot, and within a few days after all the stragglers were gathered in.

The smile of fortune has produced many a fool.

It's funny that the women's clothes that are never seen are mostly made for show.

Parents' Responsibility Great

It is the right of every child to be well born, and to the parents it must look for health and happiness. How important is the parent's responsibility, and how important that no taint of disease is left in the blood to be transmitted to the helpless child, entailing the most pitiable suffering, and marking its little body with offensive sores and eruptions, catarrh of the nose and throat, weak eyes, glandular swellings, brittle bones, white swelling and deformity.

How can parents look upon such little sufferers and not reproach themselves for bringing so much misery into the world? If you have any disease lurking in your system, how can you expect well developed, healthy children? Cleanse your own blood and build up your health, and you have not only enlarged your capacity for the enjoyment of the pleasures of life, but have discharged a duty all parents owe to posterity, and made mankind healthier and happier.

There is no remedy that so surely reaches deep-seated, stubborn blood troubles as S. S. S. It searches out even hereditary poisons, and removes every taint from the blood, and builds up the general health. If weaklings are growing up around you, right the wrong by putting them on a course of S. S. S. at once. It is a purely vegetable medicine, harmless in its effects, and can be taken by both old and young without fear of any bad results.

Write us about your case, and let our physicians advise and help you. This will cost you nothing, and we will also send our book on blood and skin diseases.

GROCERIES.

We believe the public will bear us out in the claim that one of our strongest points is that when we sell an article it is invariably as we represent it. Another point is that those who go everywhere else without finding what they want, come to us and secure it. This is because we keep our stock up to the requirements of the trade of this section, and those who patronize us, never need to look further.
